Manufacturing for equipment applications

Ningjin Yiyi Mesh Belt Co., Ltd.

YIYI MESH BELT manufactures metal conveyor belts in Ningjin, Shandong, China. Manufacturing experience dates from 1998; the company was established in 2008.

Manufacturing and order control

In-house operations include wire and round-bar drawing, forming, welding, assembly and straightening.

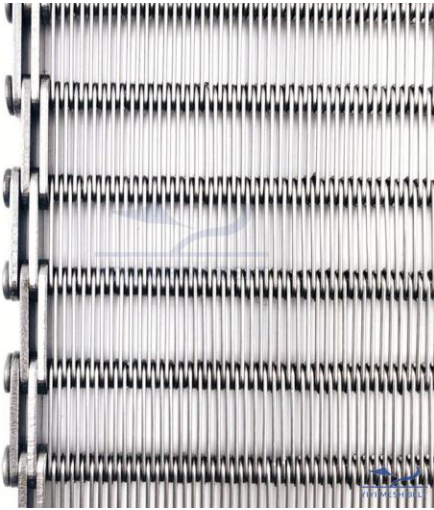

Custom orders follow drawing approval, trial production and first-article inspection before mass production, with final inspection before shipment.

Construction and surface details

Additional product configurations

Dimensional options

Parameter	Metric (mm)	Inch (in)
Eye-link pitch	3.6 / 5 / 6 8 / 10.5 / 12	0.142 / 0.197 / 0.236 0.315 / 0.413 / 0.472
Rod pitch	25.4 / 50 / 50.8 / 76.2	1.000 / 1.969 / 2.000 / 3.000
Wire diameter	1.6 / 2 / 2.5	0.063 / 0.079 / 0.098
Reinforcement wire	2 / 2.5	0.079 / 0.098
Cross rod diameter	5 / 6 / 8	0.197 / 0.236 / 0.315
Belt width	300–3000	11.81–118.11
Belt length	To approved drawing	To approved drawing

Listed options require project selection. Custom dimensions follow the approved drawing.

1 in = 25.4 mm. Inch equivalents are rounded references, not manufacturing tolerances.

Materials and configuration options

Parameter	Selection
Material	Mild steel / SUS 304 / SUS 316
Reinforcement wire	Single or double, according to the approved drawing
Edge construction	Roller chain / reinforced plate
Accessories	Reinforced plate / arched plate / groove-type structure / flights
Surface treatment	Pickling, selected for the material and application
Custom dimensions	Custom rod pitch, cross rod diameter, width and length by drawing

Select materials, geometry and components together for the application and approved drawing.

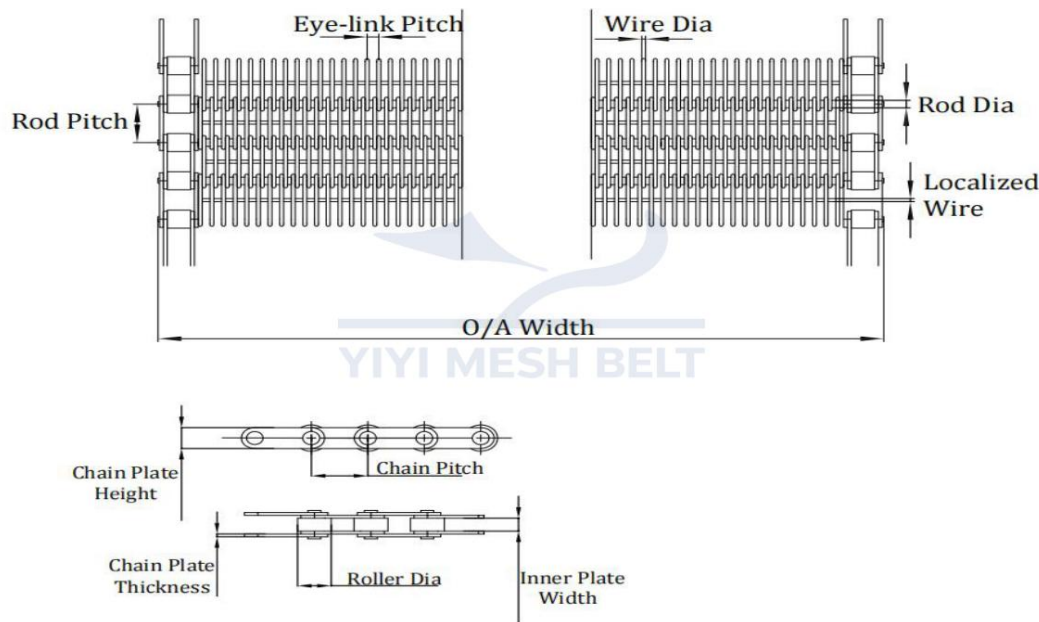

Dimensional references and equipment interfaces

Drawing requirements

Confirm eye-link pitch, rod pitch and reinforcement-wire position on the project drawing.

For chain edges, specify chain pitch, plate dimensions, roller diameter and inner plate width.

Distinguish overall width from the usable conveying width.

Dimensioned customer drawings define the final geometry, tolerances and component interfaces.

Material options for project conditions

MILD STEEL

SUS304

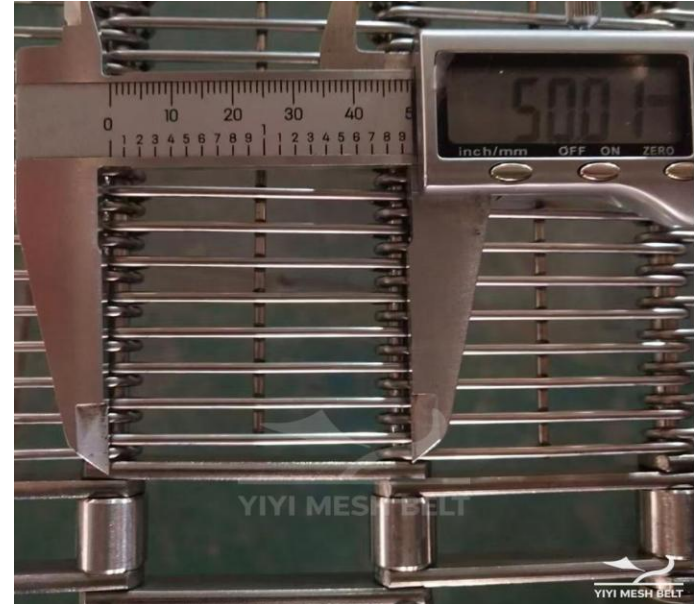

SUS316

Rod pitch options

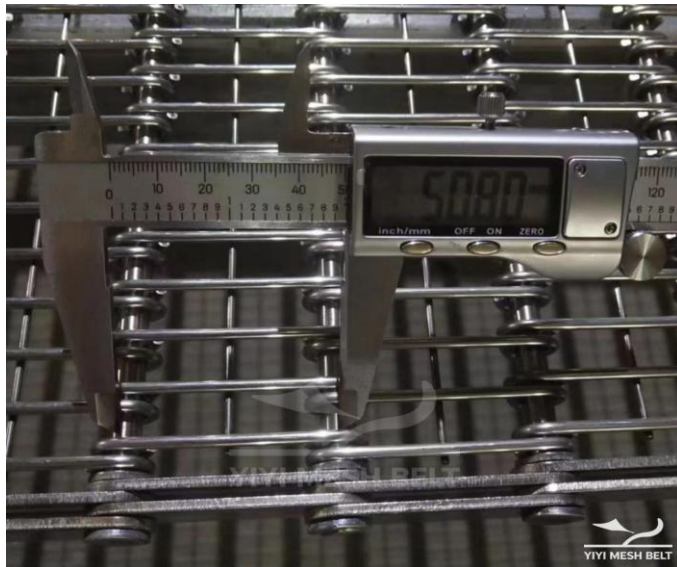

25.4 mm / 1.000 in

50 mm / 1.969 in

Rod pitch options

50.8 mm / 2.000 in

76.2 mm / 3.000 in

Edge treatment options

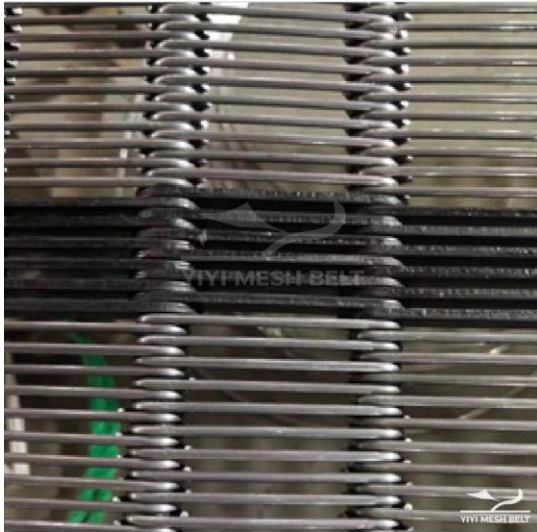

REINFORCED PLATE EDGE

Edge treatment options

ROLLER CHAIN EDGE

Accessories and construction options

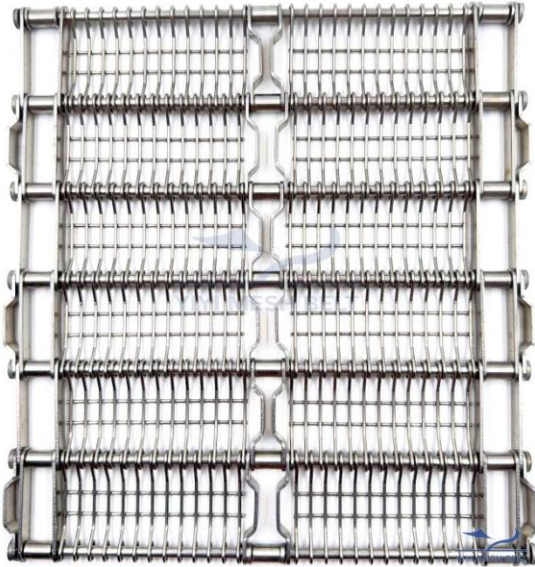

REINFORCED PLATE

Accessories and construction options

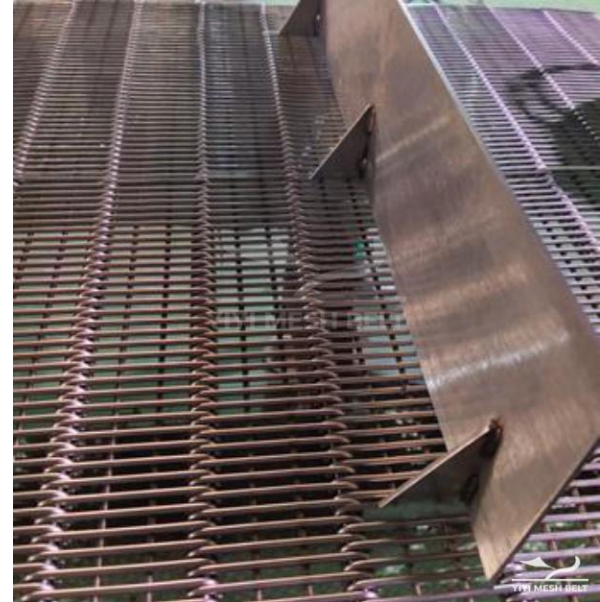

ARCHED PLATE

Accessories and construction options

GROOVE-TYPE STRUCTURE

Accessories and construction options

FLIGHTS

Matching sprockets

SUS 304 SPROCKET

Confirm belt pitch, tooth count, bore, keyway and mounting dimensions (mm / in).
Match the sprocket profile and material to the approved equipment drawing.

Matching sprockets

SUS 304 SPROCKET

Confirm belt pitch, tooth count, bore, keyway and mounting dimensions (mm / in).
Match the sprocket profile and material to the approved equipment drawing.
